To,

Whomsoever it may concern.

Subject: Reference letter for Mr. Anshay Agarwal

Dear Sir/Madam,

Mr. Anshay Agarwal joined IIT Mandi in 2009 – that was the pioneer batch of our institute. He took two elective courses (Molecular Spectroscopy & Nanoscience) offered by me and he secured highest marks in all quizzes as well in final examination. Still I kept his final answer sheets with me for showing to future students taking the same course. His understanding on quantum mechanics and its application to spectroscopy was very clear and thorough. I am sure that he studies all subjects with the same passion. It is now-a-days very rare to find a student who craves for such deeper understanding of any subject. In my approx. a decade of teaching career I have not seen any engineering student who can come close to him in terms of ‘understanding’ any subject or topic.

Therefore, I am more than happy to recommend him very strongly for a position. If you would like further elaboration, please feel free to contact me.

Sincerely,
Aniruddha Chakraborty
