

Recommendation Letter

Dear Admissions Committee,

It is a pleasure to acquaint you with one of my outstanding students, Anshay Agrawal, who is keen to pursue higher education.

I have known Anshay since 2010 during his Bachelors in Technology program at Indian Institute of Technology (IIT) Mandi. As part of the program, Anshay took several of my courses namely Network Theory in 3rd semester, Electromechanics and Electromechanics lab in 4th semester, Control Systems in 5th semester and High voltage engineering & Dielectrics in 7th semester.

Anshay impressed me from the first day with his abilities to be articulate about difficult concepts and swift at learning new things. He was always very attentive in class, had strong grasp over the subjects and could rapidly solve problems. He was also very active in lab, performed experiments with needed precautions and delivered his lab-work in excellent quality.

His perseverance was apparent as he would adhere to problems and discussions until he achieves complete command over the concepts. His outstanding commitment to his studies led him to stand among the toppers of the class.

Anshay was also the cofounder of Robotics section at IIT Mandi and helped build the very first Robot from IIT Mandi to participate in a competition held at IIT Delhi. He along with his team constructed the robot from scratch which required considerable amount of consistent effort, knowledge, dedication and team work. He is always inquisitive about new technologies and keen on dirtying his hands by indulging in developing his ideas.

Anshay is one of the best students I have worked with. I am certain he will continue to perform well and achieve great success in his career. He would definitely be an asset to the University and I strongly recommend him for a PhD program.

If I can be of any further assistance or provide you with any further information, please do not hesitate to contact me.

Sincerely,

Dr. Bharat Singh Rajpurohit
